

DRIVES & CONTROLS

SOUTHWEST ...the direction to go for all of your electric needs

| | | |
|---|---|---|
| <p><u>Heavy Duty AC Drives</u> <u>Applications:</u> Mixing, Conveyers. Packaging Machines. Machine Tools, Fans, Pumps, Extrusion and Injection Molding, Winders/Unwinders. Crushers/ Grinders, Crain/Hoist</p> | <p>1HP – 250HP Selectable Control Modes designed to cover almost all motor driven applications 3 phase 60 hertz 230/460V UL , cUL and CE Approved</p> |  |
| <p><u>Drive Multiple Duty</u> <u>Applications:</u> Crusher, Grinders, Compressors, Reciprocation Machinery, Water and Wastewater Industries, Centrifugal Pumps High Torque Mixing Chillers and Refrigeration</p> | <p>230V 3 Phase Input/ 3 Phase Output and 460V 3 Phase Input / 3 Phase Output 1-125 HP 230V Constant Torque 1-900 HP 460V Constant Torque 1-250 HP 230V Variable Torque 1- 1000 HP 460V Variable Torque Extensive I/O Capabilities</p> |  |
| <p><u>High Performance Full Featured Drive</u> Constant Torque 1-900HP Variable Torque 1-1000HP. State of the art engineering and robust, best-in-class performance.</p> | <p>Four selectable control modes – Volts/Hertz, Dynamic Torque, Sensor less Vector, Closed Loop Vector Provides drive solutions for today's demanding motor driven machinery Loss of feedback detection Sleep-wake mode High and low feedback alarms. Wide variety of process set point signals to choose from</p> |  |
