Transformers

Field Service

Substation Maintenance

Electric Motors

## Custom Transformers

Southwest Electric Co. offers state-of-the-art transformers built to your exact specifications, for every industry. For 75 years and counting, our mission remains to make your power our priority, with all products fully designed & built in the USA.

- Specialty transformers built to thrive under your application's conditions
- Maintenance, testing, & oil processing services

## Field Service & Substation Maintenance

Committed to providing exceptional service to our customers, we don't want to simply sell you a product - we want to build a lasting relationship. We offer a wide range of national field services for switchgear, industrial motors, and transformers.

- Centrally located to perform a range of field services for motors, transformers & substations
- Transformer testing & oil processing
- Switchgear maintenance & repair
- 3-5 year preventive maintenance

## New & Remanufactured Yaw & Pitch Motors

We provide integrated electric motor solutions for a wide range of industries. Our highly skilled team provides superior technical innovation to satisfy all your industrial motor needs.

- Remanufacturing to like-new condition in just 3-4 weeks
- New motors now available with up to 2-year warranty
